

I am writing today to urge the FCC to reject the NAB's petition 04-160. Terrestrial radio has become a homogenized clump of far too many commercials and little original entertaining programming. By limiting SDARS providers from innovating with programming that consumers want, the FCC would damage competition in broadcast radio and allow terrestrial radio providers such as Clear Channel and Infinity to continue providing lackluster so-called 'local' content.

Please do not limit satellite radio providers from competing with terrestrial radio with regards to local content and services.

Thank you.
